

World Environment Day NSS Activity Report

In MIMER Medical College, Talegaon Dabhade

The student volunteers of NSS undertook a sapling plantation campaign to commemorate World Environment Day 2017 at MIMER Medical College. Taking into consideration the climate and soil conditions, a variety of saplings were planted. Each of the students adopted a sapling each. The campaign was thus aimed at creating a community of passionate tree planters and lovers who work towards preventing the loss of green cover and promoting afforestation.
